An Invitation to come to The 13th Conference From the Conference Chairman

Dear Friends,

I am excited to invite all of you to attend The Thirteenth Conference on Health Care of the Chinese in North America on October 21st-22nd, 2006 in New York City.

We have put together an excellent one and a half day program with genuinely great participation from member societies of the Federation of Chinese Medical Societies (FCMS). The first day of the Conference is dedicated to an updated review of cardiovascular diseases, a topic no one can afford not knowing well regardless of one's specialty. From epidemiology to stem cell research, medical to surgical management, our esteemed speakers with an international reputation will cover them all. Special emphasis, of course, will be made to the Chinese populations. The second day of the conference will address a variety of Chinese American health issues. We can all share our experiences in our care for patients in the Chinese communities.

For local participants, it will be another great opportunity to support our organizations and get together with old friends. For out of town attendees, nothing can quite compare to the excitement and charms of New York City. The Dinner Gala on October 21st will be held at the historic Puck Building in Soho. Listed in the National Register of Historic Places, the Puck Building was built in the late 19th century in a Romanesque Revival style. Beyond the conference, one can fully utilize the weekend to enjoy the diversified entertainment that the Big Apple can offer. Fall weather will be best for the City in October. Whether it is a stroll on Central Park, a museum tour, shopping on 5th Avenue, or a Broadway show, I can assure you that it will be a very memorable trip!

Please come and join us for a wonderful Conference in October!

Respectfully,

Pak H. Chung, M.D.
Conference Chair

Conference Description

The purpose of this conference is to present the state-of-the-art features of several major topics in cardiovascular diseases and the medical as well as surgical approaches in treatments. Special emphasis will be made regarding the Chinese American population. Several other topics related to Chinese American Health issues also will be presented.

Program Highlights

There will be two key-note speakers. Dr. Gordon Fung of San Francisco will begin on Saturday with his lecture on Cardiovascular Diseases in the Asian Population. On Sunday, Dr. Mariano Rey of NYU will speak on the Vision of Asian Health Center. The CAMS Scientific Award lecturer will be Dr. Ren-Ke Li of Toronto and his topic is Stem Cell Research - Myocardial Recovery. Finally, Dr. Monto Ho of Pittsburgh will give the Sunday luncheon lecture on Antibiotic Resistance.

Conference Objectives

- I. For physicians, basic scientists and other health professionals to meet and discuss common and related health problems of the Chinese in North America.
- II. To establish a database of the incidence of disease patterns among the Chinese in North America.
- III. To establish comparative data on health problems of Chinese in North America related to cultural assimilation.
- IV. To encourage clinical and/or basic research in health problems affecting the Chinese in North America.
- V. To publish proceedings of the Conference as a means of expanding access to resources on these health problems.
